# Press Release

FOR IMMEDIATE RELEASE

## IS A FINANCIAL TYPHOON SENDONG THREATENING YOUR WEALTH?

MANILA, PHILIPPINES: Even though the Philippines has largely seemed to escape the worst of the current global recession shadow, storm clouds of financial death are forming over the nation. The rapid rise in cost of several staples of daily living in the Philippines are just one sign of what's to come; one wealth coach has emerged with not only a cure, but immunization against poverty which will soon wipe out the unprepared.

The biggest problem is a lack of education about how to protect your life savings.

“The way the average Filipino is letting central banks rob from their nest egg is a real scandal,” says author and wealth coach David Newby. “To do something about it, convert part of your savings and investments to physically owning gold and silver coins and make sure to buy them the right way.”

Most pinoyos are better served taking a lump sum option for their pension and converting half of their cash savings to gold and silver to protect themselves from inflation to come.

Newby is the author of “*Treasure Islands: Your Guide to Buying and Safely Selling Gold & Silver in the Philippines*” a book that reveals the global financial picture in detail and shows you the steps to now protect your money. He is founder of [www.PinoyGold.com](http://www.PinoyGold.com).

He is a strategist taking what money people have today and helping them grow it into a life support system for generations to come. Newby is a wealth coach who semi-retired at age 32, and he shows people how to possibly increase the purchasing power of their savings by 20-50 times in the next 3-10 years with money they *already* have.
